

Cosmo Cricket Photo Cube

Made with the October 2009 Solo Kit

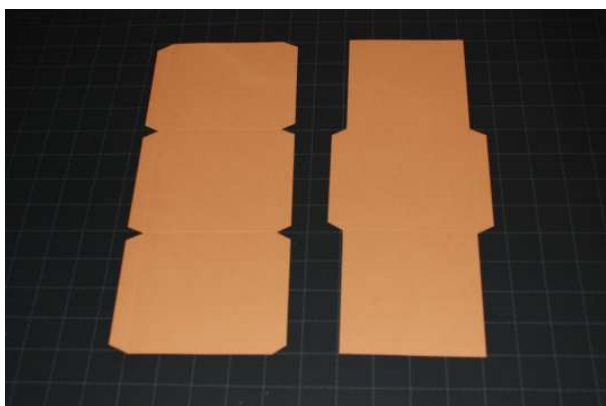

Instructions:

Cut Cantaloupe cardstock into two pieces of 5x12.

Score pieces along 12 inch side at 0.5 and 4.5 inches (0.5 inch 'flap' on each side). Turn paper and score at 4 and 8 inches. You should now have 4x4 inch squares scored.

On piece one: where the scored edges cross, snip triangles along the 12 inch side. Snip angles on the end flaps.

On piece two: cut flaps off top and bottom square, trim edges of middle flap at an angle.

Embellish and decorate each square of the first piece, on a horizontal. On second piece, embellish middle and top, making sure the middle piece is rotated 90 degrees. Attach wacky tac to flaps.

Attach cardstock pieces together like in the picture

Place empty square on bottom and fold the embellished square around, securing the tabs on the inside. Continue folding the square, attaching the tabs to the inside of adjoining squares.

Enjoy your photo cube. These are really easy to mail flat too – just include instructions on how to assemble when it gets there!
